

**BUREAU  
VERITAS**

## **GROWING SIZE.....GROWING EXPERTISE**

**Highly motivated individuals required to join a growing organization. Become a member of our impressive consulting team, many of whom are nationally recognized experts, providing technical services in advice on all aspects of Quality, Health, Safety, & Environmental (QHS&E) to a wide range of clients. If you're interested in QHS&E issues, and feel that you can make a valued contribution to business, people and our environment, we want to hear from you.**

### **About you:**

You will be:

- Driven to excel in everything you do
- Motivated to provide quality work product
- Pro-active in your approach to work
- Academically at the top of your class

### **About us:**

For 160 years, Bureau Veritas' passion is helping clients to protect their respective risks, people, assets and organizations through our expertise in the areas of conformity assessment and certification of quality, health, safety, environment and social responsibility.

With over 700 offices in 140 countries worldwide, Bureau Veritas has the resources to serve in virtually any geographical region. In the U.S., after the integration of several leading HSE and engineering consulting firms, our talented staff provides a variety of consulting services including public works engineering, program and construction management, asset management, building code compliance, construction materials testing and health, safety, and environmental services.

### **Why are we recruiting and who are we looking for?**

We have been awarded the highly visible FEMA contract for formaldehyde testing in temporary housing units throughout the Gulf Coast. The project involves visiting occupied housing with FEMA escorts and performing sampling of indoor environmental parameters. Being part of a high profile project will provide you with valuable field experience in challenging circumstances.

We are looking for the following skills:

- Technical capability in Industrial Hygiene or Indoor Environmental Quality
- Academic background in the Sciences, Engineering, Geology, Public Health
- Two years fieldwork desirable but not essential
- Ability to work in a field environment collecting quality data
- Work with minimum supervision
- Strong interpersonal skills
- Eye for detail
- Team ethic
