

CHSC 6140: STUDENT LEARNING OBJECTIVES:

At the completion of this semester, each student should be able to:

- Describe the attributes of leadership in public health.
- Describe alternative strategies for collaboration and partnership among organizations, focused on public health goals.
- Demonstrate team building, negotiation, and conflict management skills.
- Demonstrate team building methods for achieving organizational and community health goals.
- Describe an achievable mission, set of core values, and vision.
- Develop strategies to motivate others for collaborative problem solving, decision-making, and evaluation.
- Engage in dialogue and learning from others to advance public health goals.
- Apply theory and strategy-based communication principles across different settings and audiences.
- Describe how societal, organizational, and individual factors influence and are influenced by public health communications.
- Demonstrate effective written and oral skills for communicating with different audiences in the context of professional public health activities.
- Use informatics methods and resources as strategic tools to promote public health.
- Explain the importance of working collaboratively with diverse communities and constituencies (e.g. researchers, practitioners, agencies and organizations).
- Explain the importance of lifelong learning and professional service.
