

## **CHSC6460 STUDENT LEARNING OBJECTIVES:**

After completing this course, each student should be able to:

- Cite and describe important health issues domestically and globally during each of the following periods of childhood/adolescence:
  - o INFANCY
  - o EARLY CHILDHOOD
  - o MIDDLE CHILDHOOD
  - o LATE CHILDHOOD
  - o PRE-ADOLESCENCE
  - o ADOLESCENCE
- Describe biologic, genetic, psychosocial, cultural, and environmental influences upon those issues.
- Describe medical aspects of their management important to the development of population based health interventions.
- Develop and present an integrated public health intervention for approaching these issues.
