

International Health and Development

INHL 6050: PRINCIPLES FOR POLICIES AND PROGRAMS IN POPULATION, HEALTH, AND NUTRITION IN DEVELOPING COUNTRIES

Learning objectives:

At the end of the course students will be able to

1. Describe the context and design of policies and programs in health, population and nutrition (H/P/N) programs in developing countries and the interactions between the three sectors,
2. List several international collaborations for promoting H/P/N programs in developing countries,
3. Describe the features of successful programs: sustainability, capacity building, targeting, coverage, intensity, and program content, in relation to H/P/N programs,
4. Demonstrate several approaches to assessment for program design and for program effects, and,
5. List the common factors, contrasts and synergies between health, population and nutrition programs.
