INHL 7120: MONITORING AND EVALUATING MATERNAL AND CHILD HEALTH PROGRAMS IN DEVELOPING COUNTRIES

Learning Objectives:

By the end of the course, students will be able to:

- 1) Analyze maternal and child health interventions in developing countries in their socioeconomic context using a conceptual framework
- 2) Identify the main interventions to improve the health of mothers and children in developing countries
- 3) Calculate core output and outcome indicators for maternal and child health programs in developing countries, and recognize their strengths and limitations
- 4) Apply quantitative analytical tools and technologies to appropriately assess the implementation and effectiveness of maternal and child health interventions in developing countries
- 5) Utilize evaluation data in planning and decision-making and to prioritize options for improving service delivery and maternal and child health
- 6) Design a system for monitoring and evaluating a maternal child health intervention in a developing country setting
