

**International Health and Development  
2009**

**SPHL 617 Field Methods in Complex Emergencies**

Learning objectives:

At the end of the course students will be able to

- i. Articulate and advocate for the public health importance of the basic environmental services needed to sustain the health of displaced populations
- ii. Quantify populations and their levels of environmental services
- iii. Identify the primary methods of documenting health crises among populations whose lives are disrupted by war.
